Market Outlook

The objective on May 2024 was to identify underlying assets with greater liquidity in the money market. Government money market (MM) bond yields exhibit relative stability, whereas corporate MM bond yields offer more attractive returns. Currently, the alternative underlying asset that aligns with these criteria is SRBI (Sekuritas Rupiah Bank Indonesia). SRBI has gained prominence due to its availability through a broader accessible auction mechanism. Conversely, time deposit rates remain static. Nevertheless, given the elevated benchmark rate (BI rate) and SRBI rate, it is anticipated that bank deposit rates will inevitably rise in the near future. Money market funds are one of the best solutions for diversifying overall investors' portfolios.
